Company profile

8Ternity Technologies HongKong Co., Ltd.

is located at HongKong China, and has reached in-depth cooperation with major high-tech research and development centers in China and other country. It is a high-tech enterprise specializing in the fields of police,military and government security. With a keen insight into cutting-edge technologies and continuous exploration, the company is committed to providing excellent Security and Investigation Solution to customers around the world, promoting the digital transformation and intelligent upgrading of the industry.

The company has a rich and diverse product line, covering **Criminal investigation products 、Technical investigation products、Anti-drug products、Anti-terrorism and anti-explosion products、Emergency rescue products、Intelligent traffic products、Drone and unmanned boat products、Communication & Conmand vehicles、Internet security and public opinion management**

These products, with their excellent performance, stable quality, and innovative functions, winning high recognition from domestic and foreign customers. In terms of services, the company has established a complete pre-sales, in-sales, and after-sales service system, providing customers with comprehensive and customized solutions, promptly responding to and solving problems encountered by customers during use, and ensuring that customers can enjoy an efficient, convenient, and attentive service experience.

Since its establishment, 8Ternity Technologies HongKong Co., Ltd. has always adhered to the development concept of "Innovation-driven, Quality First, and Win-win Cooperation", taking technological innovation as the core competitiveness and continuously improving product quality and service levels.

In the future, the company will continue to deeply cultivate in the field of safety and explosion prevention, actively expand domestic and foreign markets, strengthen in-depth cooperation with partners, strive to become a leading enterprise in the global security system, and contribute to promoting scientific and technological progress and social development.

Profession Carefulness Secure

Criminal investigation products

01

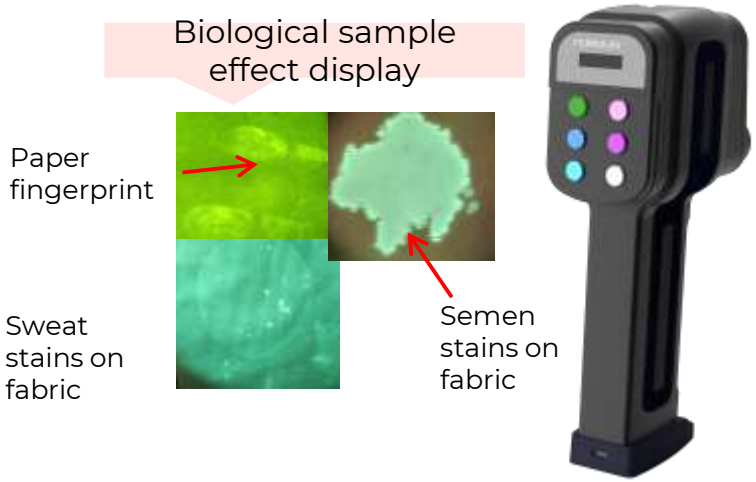
Products for criminal investigation are crucial tools that assist judicial organs in conducting crime investigations and cracking down on criminal activities, playing an extremely important role in the modern criminal investigation system. These products are supported by criminal science and technology as the core, and their scope is extremely extensive. Ranging from trace inspection to document authentication, from forensic evidence analysis to electronic data investigation, there are corresponding professional products to provide assistance in every link.

01| High Halal color wireless night vision instrument （ET-SSV100A)

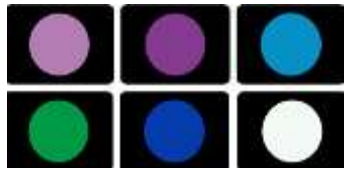
02| Handheld night vision forensics instrument (ET-NV200-P)

03| Remote intelligent multi-point waiting system (ET-RIW100C)

04| A6 multi-band uniform light survey light source



Spot effect real shot



05| Multifunctional fingerprint camera system DF20

Fingerprint camera system
Brightness: 99 Grating: 50
Battery: 47 Polarization: 0 Status: Standby

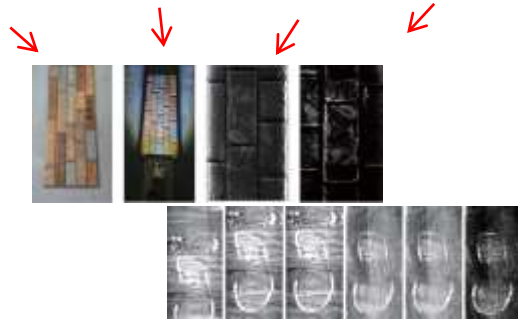
06| F6-D Laser Footprint Scanner

Natural light effect

Footprint light effect

F6 Footprint Collection Effect

F6-D footprint collection effect



Product parameters
Size: 481*321*139mm
Weight: 6.3kg

07| M2 Dual-band Laser Evidence Searcher

Real shot effect

Sperm stains

Thermal insulation probe protects the test material

Technical investigation products

02

Products for technical investigation are important tools in the modern criminal justice system that assist in the implementation of technical investigation measures, and they are of great significance for improving the efficiency of investigation and accurately cracking down on crimes.

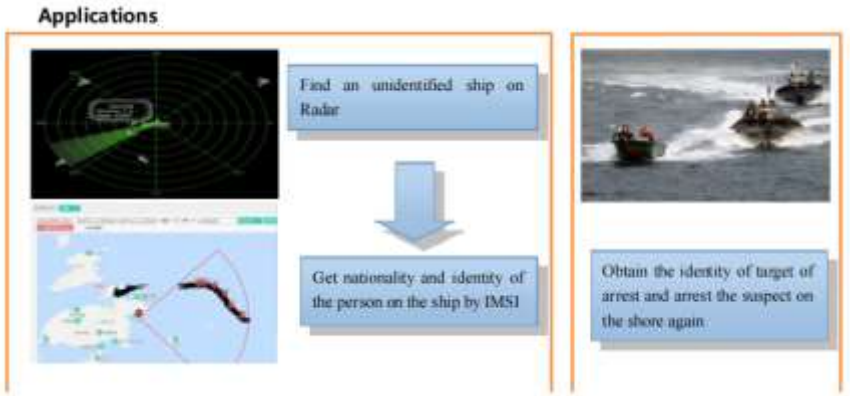
01 | 4-channel carrier active portable code detection and positioning equipment

02|Visualization of Intelligent Direction Finder（2G+4G+5G）

High-rise building

Aerial View

03| Ship Code Information Acquisition



04| UAV-mounted Visual Intelligent Direction Finder

Black list Tracking

Patrol in the air

05| Portable High-power Full-band Frequency Jammer

06|Portable Monitoring Equipment on Mobile Satellite Communication

07| Portable Anti-wiretap Photo Detection Kit (Office Inside)

08| Video surveillance laser shield

09|Mobile Forensic System

10|Computer Forensic System

11| Office Anti-recording Products

12| Camera laser intelligent detector

Anti-drug products

Anti-drug products are mainly used to prevent, detect and combat drug-related issues. Detection products can accurately identify the nature of drugs both in laboratory testing and rapid on-site testing. Law enforcement assistance products can effectively combat drug crimes.

03

01 | Handheld drug Raman detector

02|Portable Explosives and Drugs Detector

03| Iris and Drug Detection Integrated Instrument

Anti-terrorism and anti-explosion products

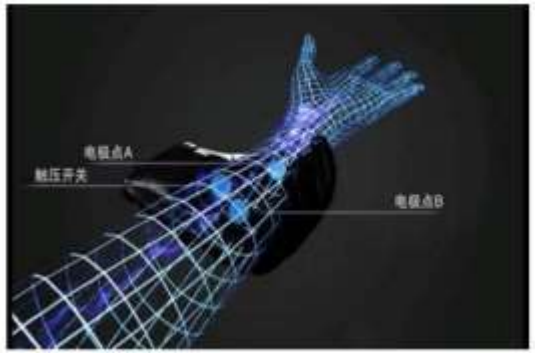
04

Anti-terrorism and anti-explosion products are a series of products developed to deal with dangerous situations such as terrorist activities and explosions and to ensure public safety. They include products for security inspection and detection, protective equipment, explosive ordnance disposal, monitoring and early warning, as well as communication and command.

01 | Electronic Control Device（TX200P）

02|Electronic Control Device（TX100P）

03| One-shot catch-pulse catch gloves



04| Net Catcher

05| WHEEL CATCHER
NET NAIL COMBINED WITH ROADBLOCK WD-1

Emergency rescue products

Emergency rescue products are a series of products used to provide emergency rescue, ensure life safety and reduce property losses when emergencies occur. They include life detection products, demolition and rescue products, protective equipment products, medical emergency products, lighting equipment products, communication equipment products and water rescue products.

05

01 | Portable lighting stick

02|Backpack mobile lighting energy storage system

03| Water rescue bomb

04| 3D Imaging Through Wall Radar

05| BATTERY RESCUE TOOLS

DETAILS

Increase the anti-extrusion ability of the t

06|ELECTRIC HYDRAULIC CUTTER

DETAILS

Smart display,multi socket available

DETAILS

It is made of special materials with good cutting property and durability

07| DEMOLITION ROBOT

Intelligent traffic products

Intelligent transportation products are a series of products that use advanced technologies such as the Internet of Things, big data, artificial intelligence, and communication to carry out intelligent upgrades and transformations of the traditional transportation system. They aim to improve traffic efficiency, ensure traffic safety, and enhance the travel experience.

06

"Real-Time" Edge Collaborative Traffic Signal Control and Optimization System

Drone and unmanned boat products

In the field of security patrol, it can perform tasks such as reconnaissance, patrol monitoring, and attacks in specific areas. In the civil field, it is widely applied in areas such as agricultural plant protection, surveying and mapping, energy inspection, security monitoring, rescue, and logistics.

07

01 | Unmanned target ship on the water surface

02|Fixed unmanned aerial vehicle detection equipment

03| unmanned aerial fusion positioning device

04|Vehicle-mounted uav detection and control integrated equipment

05|Hand-held unmanned aerial vehicle inspection and strike integrated equipment

06| Hand-held drone countermeasures devices

Communication & Conmand vehicles

08

When public security and other law enforcement departments carry out tasks, it provides functions such as on-site command, communication scheduling, and information processing. It can display information such as the on-site map, police force distribution, and surveillance videos in real time, which is convenient for commanders to make accurate decisions. It can also use the video conferencing system to conduct remote meetings with superior command departments or other relevant units, and convey instructions and report situations in a timely manner.

Communication Command vehicle

Internet security and public opinion management

09

It is an important task to ensure the healthy and stable operation of cyberspace and maintain the harmonious development of society. Through the establishment of a data processing system, by adopting technologies and management measures, we can crack down on cybercrimes and handle improper public opinions.
